

## Bar Code Scanner for ALANA

### Handheld Scanner

The Voyager hand-held, single-line laser scanners offer aggressive scanning of all standard 1D bar codes. This scanner has united form with function in becoming the industry benchmark for value and performance. These sleek scanners feature patented automatic infrared activation and decode all standard 1D bar codes, including GS1 DataBar™ (formerly known as RSS codes). The Voyager also includes patented CodeGate® technology which allows the user to easily target the desired bar code and complete data transmission with the press of a single button. For presentation scanning, we offer a stand with automatic in-stand detection technology.

### Features

- Automatic Trigger: Use scanner as either a hand-held device or a fixed presentation scanner when mounted in the stand
- 650-nanometer Laser: High-visibility laser allows user to place laser line on selected bar code
- CodeGate Technology: Zero in on desired code and complete data transmission with the push of a single button
- Flash ROM: Future proof POS system with free firmware updates
- Data Editing: Format bar code data to meet host system's specific requirements
