

POS Hardware - Payment Kiosk

NetCash Kiosk

PCS' NetCash Kiosk accepts currency directly and securely into student, teacher or staff meal accounts in real-time. Which means that the money is immediately added to the balance on their accounts and is available at the POS on the serving line.

The **Cashless Cafeteria** is here!

- **Faster Lines**
- **Less Cash in the Cafeteria**
- **More Accountability**

Combined with PCS' PayPAMS Parent Account Payment System the NetCash Kiosk allows PCS customers to create a completely "cashless cafeteria".

The NetCash Kiosk can be mounted at any secure and convenient location.

- In or just outside the cafeteria
- Near the school entrance
- In the secretary's office
- In the hallways
- Even out doors

The NetCash Kiosk consists of a bill validator, printer, user interface and an intelligent control board. The NetCash Kiosk is housed in a secure metal cabinet made of 13 gauge steel, with a 3-point locking mechanism and a security flange on the hinge side of the door. A mounting base (pedestal) is also available. Power Source and an optional network drop are all that is required!

The NetCash Kiosk can be configured FASTrak POS line definitions in 30 seconds, just like a POS!
