

AUTOMATIC ORDERING & RECEIVING COMPONENTS

Document Manager for Pre-Order Processing & Receiving

Pre-Order screen facilitates every type of ordering from one screen

Via a simple, easy-to-use pre-order process, orders can automatically reflect forecast menu needs, par and re-order points, filtered by class, category, supplier or location. Or users can access simple lists and shopping lists with quantities already entered. Site managers can edit and round up or down to the nearest purchase or usage unit. Once the manager is happy with the order he/she presses one button and the order is split into Requisitions for district approval, Purchase Orders direct to vendors (in draft, for later editing and submission), and Supply Orders to the warehouse, all based pre-assigned setting in each item.

Processing the Pre-order automatically creates Requisitions for District Approval, Supply Orders to the warehouse and Purchase Orders to outside vendors.

Document Manager

Users can control and monitor all ordering and receiving activity in the Document Manager. View, delete, edit (if still in draft mode) and cancel or reverse. Suppliers and due dates are clearly marked. Click the top of any column to sort by column heading.

				1 Lf / Lf - 1 Lf / Loaf			1.00			11.00

Partially received orders automatically create back orders (if allowed by the district) or can be closed by the user.

Rejected items can be recorded and subtracted from the receiving screen along with documentation of reason.
