

## Point of Sale for Touchscreens & Tablets

### Overview

The **WebPOS** supports multiple web browsers and is easy to access on your touchscreen or tablet, while still able to run offline when communications are down without losing transactions. Supporting most pinpads, scanners, and cashdrawers, there's nothing to install, making implementation a breeze.

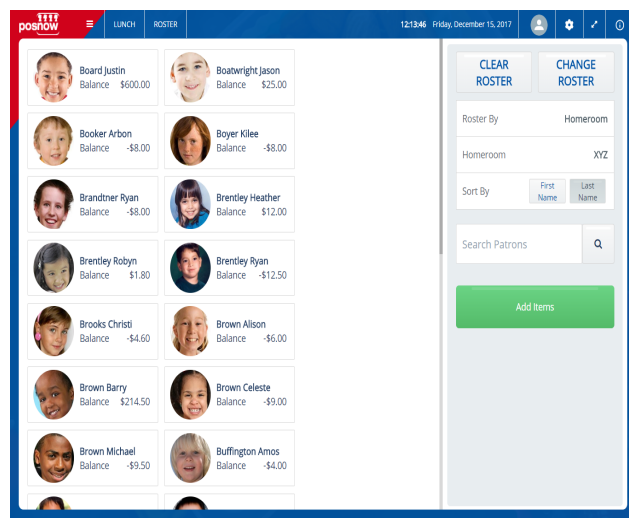

### Features

- Multi-browser operation
- Hardware agnostic for peripherals
- Single or dual line operation
- Patron Pictures for easy identification
- Allergen alerts and item sale blocking
- Speedy "Hands Free" Express Mode
- Visible line queue with pictures
- Automated voice prompts to control lines
- Full itemization and á-la-carte modes
- Large, easy-to-read keys
- Background and text color options
- Food graphic library for key placement
- Easy upload of your own food pictures
- Multiple menu keyboard layouts
- Roster Mode with pictures for classrooms
- Supports left or right hand operation
