*Students over the age of 13 can be added to Parent accounts to enable Student Ordering directly to school cafeterias via smart phone.*

## School Ordering

Teachers and nutrition staff can enter orders for each classroom or any alternate serving area. Orders can be entered as far in advance as you allow in your setup with deadlines set by you. Ordering types include “bulk” ordering, individual student ordering, and student ordering with choices and a la carte offerings.

Bulk ordering is the simplest, with counts being entered for each item listed. There is a space for notes, as well.

Ordering for individual student can be designed to provide limited choices or a variety of entrees and a la carte selections.
